

Our pets teach us the most important thing we know, compassion. They give it to us freely and in abundance. In return, we take care of them as best we can. The wools used in dharmadog karmacat toys are cleansed without chemicals and retain the warmth and scent of lanolin that your pet can't resist. We use only safe, non-toxic dyes, and our production minimizes impact on the environment. Your toy is handmade by women's collectives in Nepal, and your purchase supports these artisans and their families.

CARE: The lanolin in the wool keeps your felt toy naturally clean. If necessary, it can be spot cleaned with a sponge.

ADVICE FOR USE: This product is 100% natural wool, but you should observe your pet's behavior with the toy. If they are tearing apart the toy or ingesting the wool, it is not an appropriate toy for your pet.
